

Updates from Growing Minds Australia

Here is a snapshot of what the GMA team has been up to this Winter

GMA Infrastructure Callout

Expressions of interest (EOIs) are invited from Growing Minds Australia members, to apply for amounts up to \$800K to develop clinical trial network (CTN) research infrastructure for ongoing use in the Growing Minds Australia Clinical Trials Network.

Successful EOIs will proceed through a consultation process with the GMA-CTN, including presentations to the GMA Scientific Advisory Committee, before more detailed plans and contractual arrangements are finalised.

Applications close **5pm Friday 23 June 2023**.

For further information and application form please click the link:

ICEPS 2023

GMA was excited to be an official supporter of this years ICEPS (International Congress on Evidence-based Parenting Support) conference presented by PAFRA. GMA members including Mark Dadds, Janice Kan and Lucy Tully presented over the 3 day conference run online from the 6th-8th June, 2023.

Their talks are available for re-watch for the next 3 months for those who bought tickets. For more information please click: [ICEPS 2023 \(pafra.org\)](#)

GMA Flagship Trial Update:

GMA is excited to announce that the The flagship trial for mental health in schools led by GMA Member Laura Hart has recently published a piece on mental health literacy for supporting children, read more here:

Early-Mid Career Researcher Network

Growing Minds successfully launched the EMCR in April of this year. Following a successful first meeting, leadership roles are now being established. The EMCR will focus on supporting and empowering researchers to have meaningful input with future projects with GMA.

The EMCR is still open for more members to join, Please contact growing-minds-australia@sydney.edu.au

Or for more information, see details here: [Early Mid Career Researcher Network - Growing Minds Australia](#)

ACTA conference

As a member of ACTA, GMA is happy to share details of the upcoming 2023 ACTA International Clinical Trials Symposium, and encourage submissions.

Message from our Director

Remember face-to-face meetings and the great spin offs; new collaborations, group discussions, question time, hotel room towels, buffet breakfast, drinks at the bar! So many in GMA don't even know each other and we have so much to work on as a group. Soon I will be putting out a call to gauge interest in a good old fashioned face-to-face meeting. Please start thinking about how we could run this and what would make it interesting and valuable to you.

New Research Publications

GMA member Mark Bellgrove and his team have contributed to new findings about the use of the Strength and Difficulties Questionnaire for Aboriginal And Torres straight Islander Children.
